

ISLA

Isla's recessed LED downlights are best in their performance and style, highly efficient UGR<19 reflector provides glare free illumination, modern style reflector with combination of faceted and specular, tunable white technology available as an option for human centric lighting, interchangeable CCT (3000K, 4000K, 5700K) with external switch upon request, wide beam spread offers maximum spacing between down lights, equipped with latest generation of LED's with high output lumens package, sealed to IP54 from below the ceiling, choice of five different sizes and wattages for wide range of applications.

Material- AL1060 aluminium body

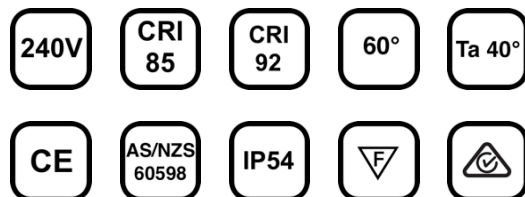

Finish- White powder coat paint RAL 9016

Efficacy- 99-104lm/W

Input voltage- 240V 50/60Hz

Dimming- Dali, 0-10V, triac

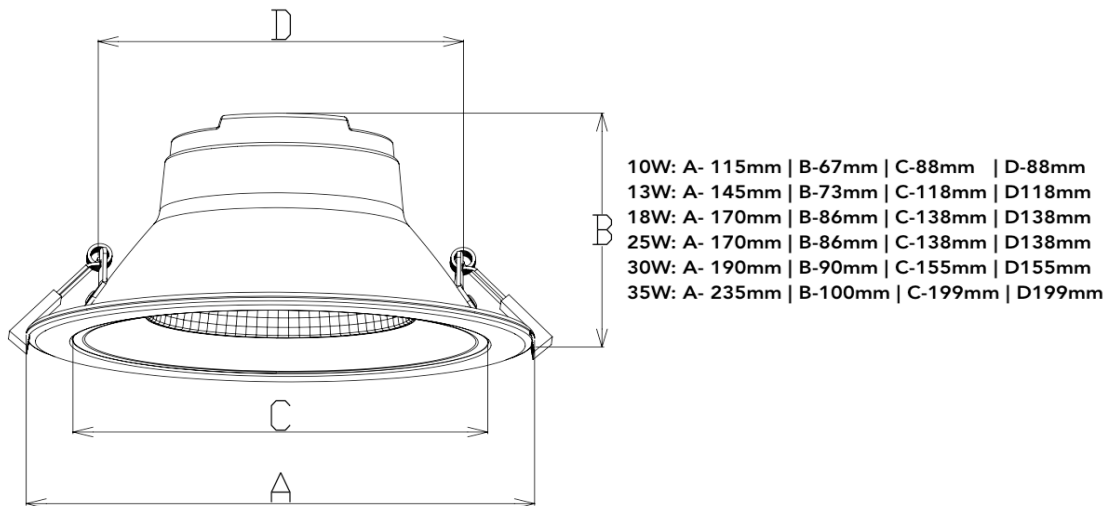

Life: 58,000 Hours L80 B10

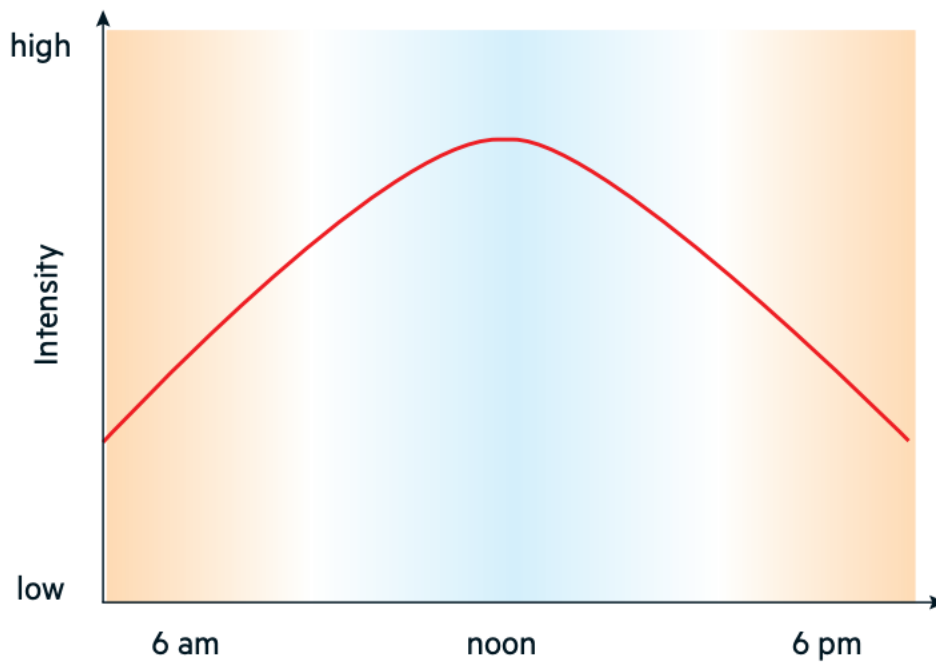

Model number: IS-18W-4K-S	
Wattage	10W 13W 18W 25W 30W 35W
CCT	3000K 4000K 5000K 5700K CTA 3-CCT
Controls	S: Standard D: Dali A: 0-10V T: Triac

Dimension

Colour Tunable White (CTA) – Human Centric Lighting (HCL)

Studying nature illustrates how even the slightest changes in light can influence our moods and how we perceive objects. This notion is at the heart of Tunable White technology, which is based on the natural colour changes in the light over the course of the day.
